

SalesProcess360 Overview

SalesProcess360 is dedicated to helping companies get ROI from CRM by putting winning processes in place at all stages of the sales cycle. Whether you have CRM or are considering implementing one, we can help.

Less than 20% of companies believe they are getting ROI out of CRM. Getting ROI from CRM is about process, not just technology. Most companies have processes and visibility on the back end of the sales cycle for order processing, inventory tracking and more, but are lacking on the front-end, sales-generating stage of their businesses. Focusing on effective yet basic processes to manage the blocking and tackling aspects of selling will put you steps ahead of your competition.

Our team is made up of CRM Consultants with real-world experience and the passion to help your team get the most from CRM.

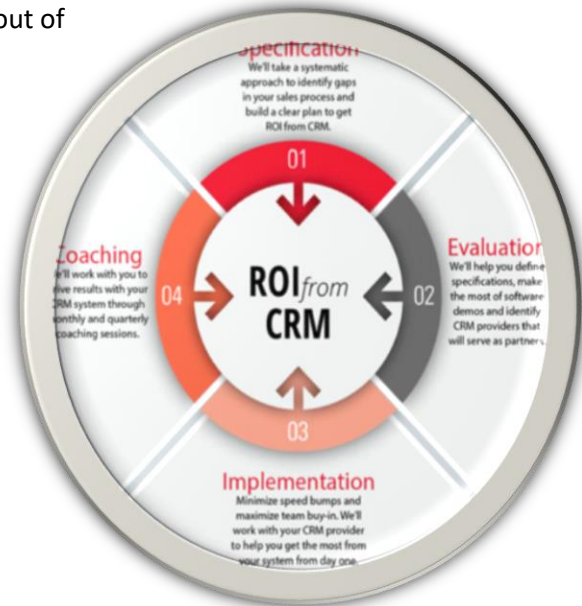

Here's what we can do for your business:

CRM Audit

Are your processes driving how you use CRM? The SalesProcess360 CRM Audit is a systematic approach that will help you get ROI from CRM, whether you already have CRM or are considering implementing the technology. The SalesProcess360 CRM Audit will identify gaps in your sales processes and what it will take to fill those gaps. The result: a defined plan for ROI from CRM based on your company's true needs. >> Learn more at salesprocess360.com/salesprocess360-crm-audit
